# A full portfolio of products to optimize the performance of your building

## RAC

### Residential Products

#### High Wall units, Fixed Speed Compressor, Cool Only, R410a, (T3)

High Efficiency models, Turbo Cooling, Operation up to 60 Deg C Ambient, 4-ways swing, Comfortable sleep, Long Distance Air Flow (up to 25mtrs for 32K model), 24-hours timer, Self Diagnosis, Blue Fin for Indoor / Outdoor

#### Floor Standing units, Fixed Speed Compressor, Heat Pump, R410a, (T3)

Heat Pump, Washable Air Filter, Sleep mode, Auto Restart, 24-hours timer, Self Diagnosis, Golden Fin for Indoor / Outdoor

#### Window, Fixed Speed Compressor, Cool Only, R410, (T3)

Tropical compressor, High Efficiency Cooling, Fresh Air switch, Easy removable panel, Slide chassis design

#### High Wall units, Fixed Speed Compressor, Heat Pump, R410a (T3)

Follow me, Auto restart, Turbo Cooling, Louver position memory, 4-ways swing, Dual Side Installation, 24-hours timer, Self Diagnosis, Gold Fins for Indoor / Outdoor

### Commercial Products

#### Floor Standing units, Fixed Speed Compressor, Cool Only, R410a, (T3)

High Efficiency models, Washable Air Filter, Auto restart, 24-hours timer, Self Diagnosis, Blue Fin for Indoor / Outdoor

## PAC

### Residential Products

#### Ducted Split Units T3, Fixed Speed Compressor, R410a

Flexible air return from bottom or rear, Reserved port for key slot and smoke alarm device, Low sound level and high efficiency, Adjustable ESP for flexible installation, Standard wired controller, Optional wireless controller, Fixed compressor, Cool only Models

#### Cassette Split Units T3, Fixed Speed Compressor, R410a

Stylish Design, Built Built-in drain pump, Low sound level and high efficiency, Fresh air inlet, Standard wireless controller, Optional wired controller, Fixed compressor, Cool only Models

#### Ducted Split Units T3, Inverter Compressor, R410a

Flexible air return from bottom or rear, Reserved port for key slot and smoke alarm device, Low sound level and high efficiency, Adjustable ESP for flexible installation, Standard wired controller, Optional wireless controller, Inverter compressor, Cool only Models

#### Ducted Split Units T3, Fixed Speed, R410a, Top Discharge Condensing Unit

Copper tube/aluminum fin coils, Wired controller & Wireless Controller, Fixed compressor, Top discharge condensing units, Cool Only Models

### Commercial Products

#### Ducted Commercial Split Units T3, Fixed Speed Compressor, R410a

Powder Paint finish, Copper tube/aluminum fin coils, Belt driven blower fan, Fixed compressor, Top Discharge Outdoor Unit, Disposable Filters, Cool Only Models

#### Packaged Units T3, Fixed Speed Compressor, R410a

Powder Paint finish, Direct/Belt drive blower motor, High & low pressure switches, Copper tube/aluminum fin coils, Rigging holes in base rails for lifting, Disposable Filters, Cool Only Models

## VRF

### Residential Products

#### VRF, Side Discharge Outdoor units, Heat Pump, T3 Market, R410a

3 Sizes from 4 to 6HP, Single and Three Phase, Wide Range of Compatible Indoor units, Wide Range of Compatible Individual & Central Controllers and BMS converters

#### JROG, Side Discharge VRF Outdoor units, Heat Pump, T3 Market, R410a

5 Models from 4 to 10HP, Wide Range of Compatible Indoor units, Wide Range of Compatible Individual & Central Controllers and BMS converters

### Commercial Products

#### VRF, Top Discharge Outdoor units, Heat Pump, T3 Market, Scroll Compressor, R410a

Single Module Capacity up to 20HP, Maximum single system capacity of 60 HP, Maximum Operating Temperature range up to 53 degrees C, Wide Range of Compatible Indoor units, Wide Range of Compatible Individual & Central Controllers and BMS converters

#### JTOG VRF Top Discharge Outdoor units, Heat Pump, T3 Market, Scroll Compressor, R410a

Single Module Capacity up to 22HP, Maximum single system capacity of 8HP, Maximum Operating Temperature range up to 55 degrees C, Refrigerant cooled PCB, Wide Range of Compatible Indoor units, Wide Range of Compatible Individual & Central Controllers and BMS converters

**INSTALL CONFIDENCE**

Founded in 1874, YORK has been an industry leader since the beginning. A revolutionary YORK "air washing" system installed in 1914 was the precursor to modern-day air conditioning.

In 1924, the world's first air-conditioned office building used YORK equipment. And. Today, YORK products are heating and cooling iconic structures, including the Empire State Building, the English Chunnel, the U.S. Capitol Building and the Sydney Opera House.

In 2005, YORK became a brand of Johnson Controls — a Fortune 100 company and a leader in world-class manufacturing. This has allowed us to invest in industry-leading research and development to deliver a wide range of products built with world-class quality. In fact, YORK home comfort systems undergo performance and reliability testing that is unmatched in our industry, ensuring energy savings and lasting performance for years to come.
